

WG Belgian Grid Feedback to Users' Group

Frank Wellens
20/06/2013

Shared connexions

Draft of a new annex 11 of connexion contract presented in WG BG

Comments received from Febeliec & Febeg

- General comments (collateral impacts on some other annexes; how to organize the legal relationship between the grid users ?...)
- Specific & textual comments

Next steps :

- New version of annex 11 to be presented to next WG Belgian Grid
- New template of other annexes of connexion contract where impacts
- Formal regulatory approval trajet

Large investments projects - status

General presentation of the latest evolutions of 3 major investments projects:

- project Alegro
- cluster Seagrids (project Nemo, projet Belgian offshore grid & projet Stevin)
- project Brabo

Federal Grid Code :

- Impacts of the European Network Codes on Grid Code(s)
 - FEBEG keeps preoccupations on principles & rules stated in NC 'Requirements for Generators'
 - General constataions: European NC are on a final stage at european level and need to be transposed; transposition freedom (to some extend) to be adequately used;
- Work process proposal to work globally on Federal Grid Code
 - To update Grid Code on several "belgian" issues (ex: 'Point de vue relatif au mécanisme de réservation de la capacité sur le réseau Elia pour les nouvelles unités de production'; CDS principles; shared connexion; imbalance products issues...)
 - To transpose the concepts & requirements of ≈ 10 European NC
 - To use IT technologies to share documents & lead discussions

=> Proposal on work process & timing
