- TSOs and PXs participating for developing and implementing the XBID Solution
- PXs participating; REE and REN are observers
- PXs participating, adherence to joint project ongoing

¹ The list is based on the present status of PXs active in the concerned countries; it does not prevent any other PX joining as soon as they are selected as NEMO in one of the countries.

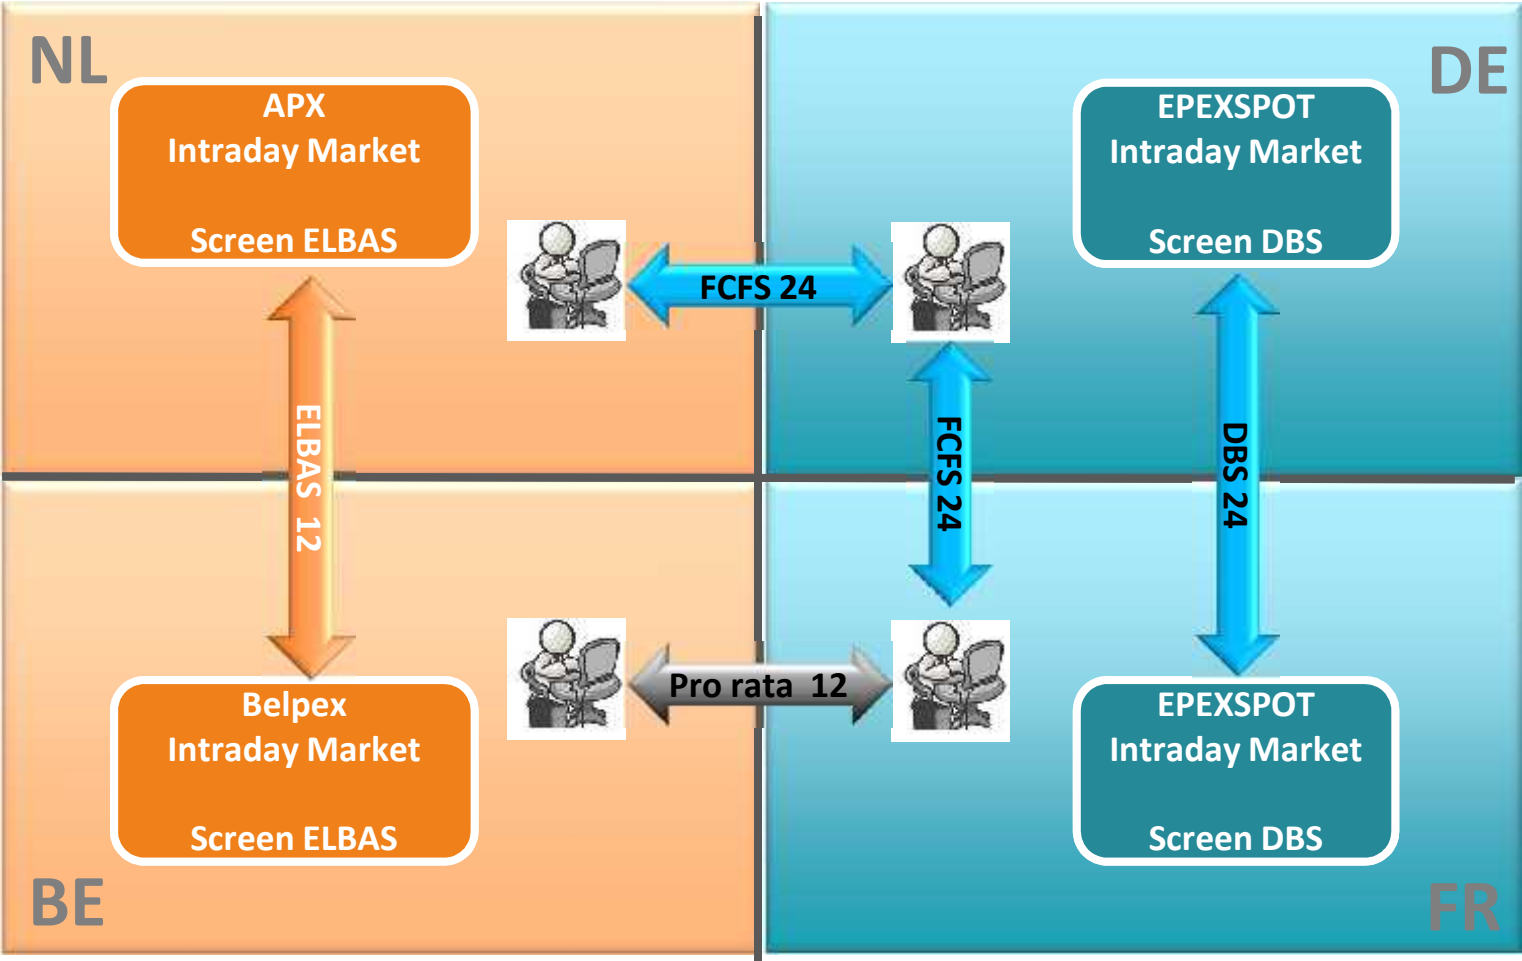

QUICK WINS & INTERMEDIATES

Therefore the parties have agreed that **between now and go-live of XBID Solution**, the following developments* will be implemented on the Belgian borders:

- explicit First Come First Served allocation on FR-BE border
 - 24 gates, 1h neutralisation time, hourly products
- quick wins on NL-BE border
 - 12 -> 24 gates, 1h neutralisation time
- In line with the target solution, implicit allocation on Belgian borders will be implemented with the following specifications:
 - 24 gates, 1h neutralisation time
 - hourly products and block bids

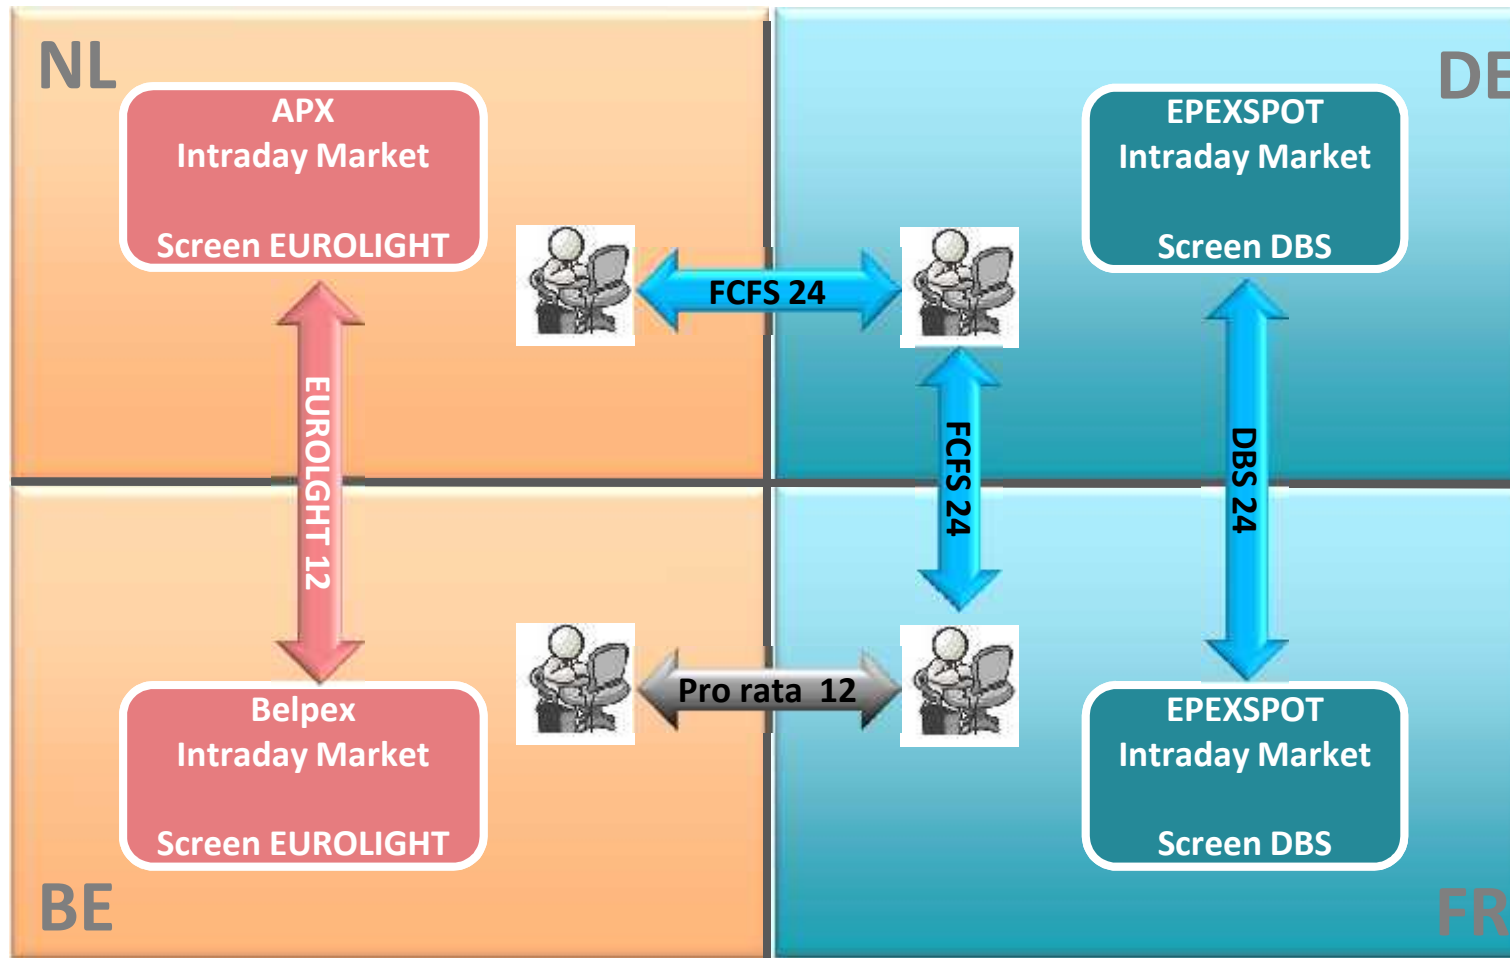

** Subject to approval of the concerned regulators*

CURRENT SITUATION

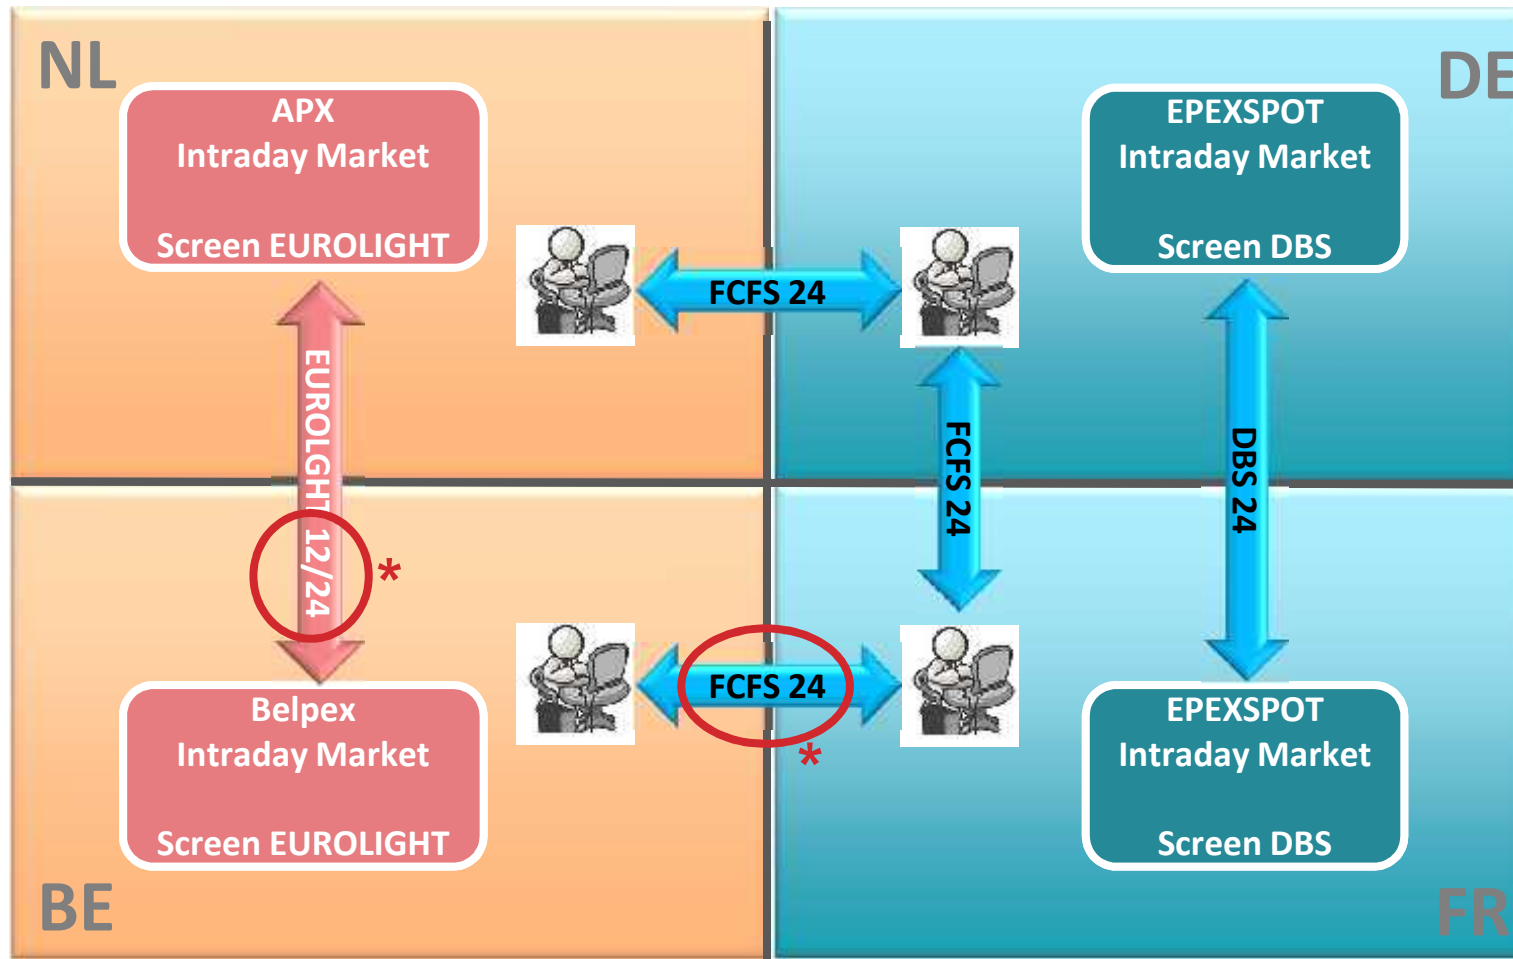

INTERMEDIATE – SEPT 2015

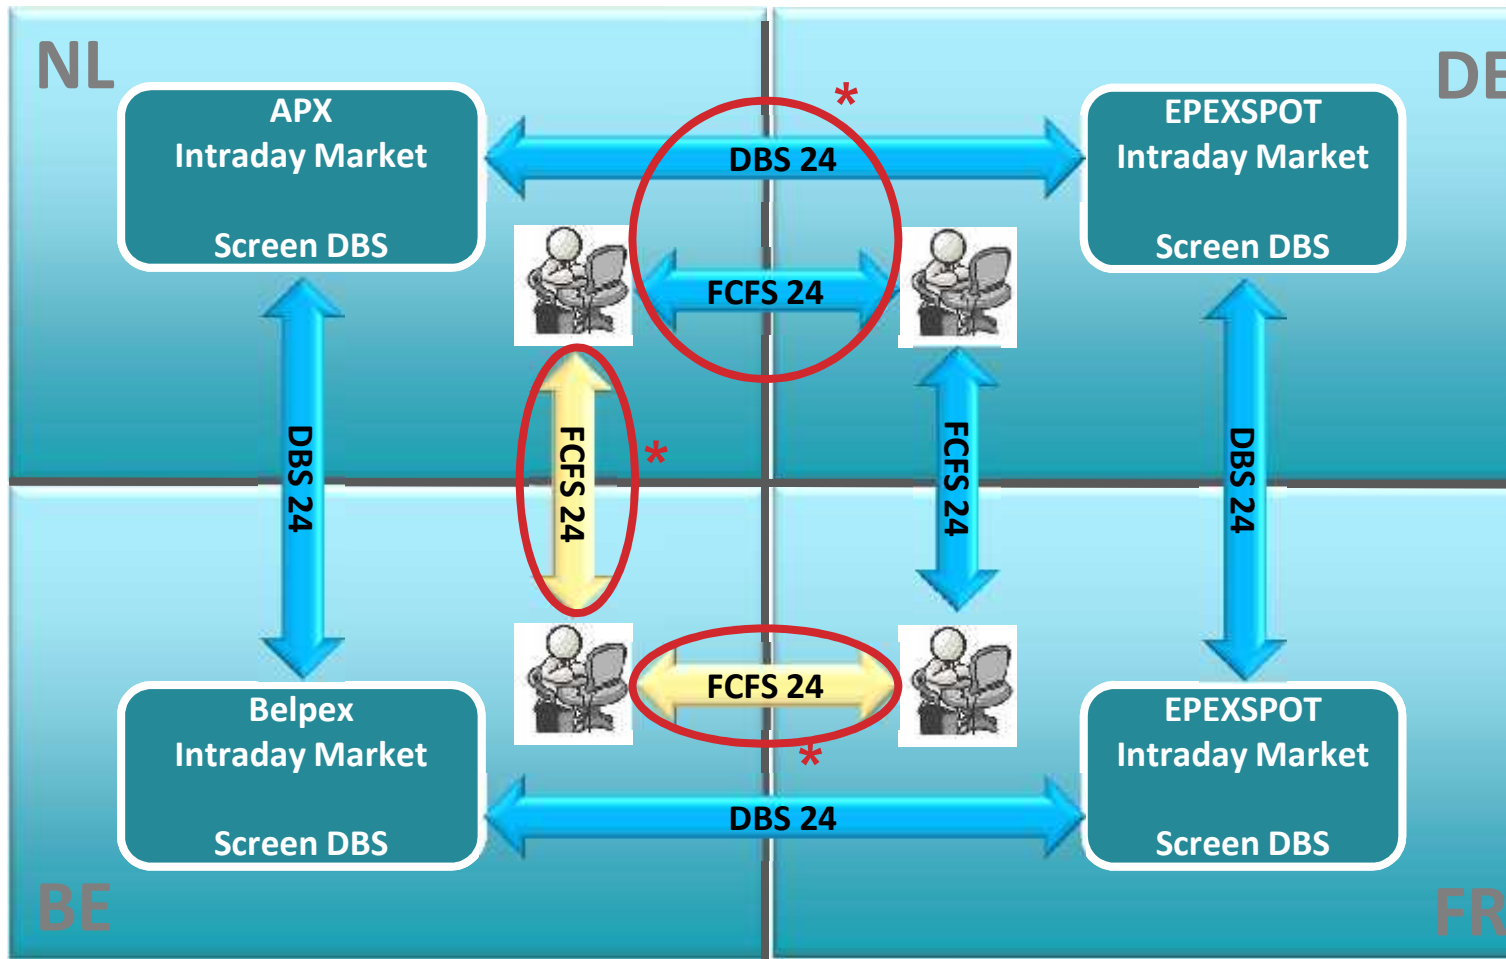

Methods for allocating capacities on Belgian borders remain unchanged !

POSSIBLE INTERMEDIATES ARE BEING INVESTIGATED*
