Joint meeting of
**Elia's European Market Design Work Group and
Belpex Users' Group**

Tuesday 15 October 2013
Elia's headquarters, Boulevard de l'Empereur 20, 1000 Brussels

The NWE Price Coupling project is intended to be launched in November 2013, subject to successful completion of the final tests and simulations and regulatory approvals.

The result of this project will be the creation of one integrated day-ahead wholesale market including the CWE region, GB and the Nordic area.

To duly inform the Belgian market participants on the details of the project as well as the contractual and operational changes they imply for the Belgian wholesale market organisation, Elia and Belpex have joined forces and are happy to invite you to a joint information session of Elia's European Market Design working group and the Belpex Users' Group.

An invitation containing a more detailed agenda will follow shortly, but please already note this date in your agenda:

15 October 2013 in Brussels

Please note that similar information sessions will be organised in Amsterdam and London:

- 14 October 2013 in Amsterdam
- 15 October 2013 in London
