

FLOW-BASED PARALLEL RUN RESULTS

ATC orders books are used to simulate the market results that would be obtained with Flow-Based allocation.

The Flow-Based parameters are computed each day by TSOs.

The market results are computed and published each week on CASC's website:

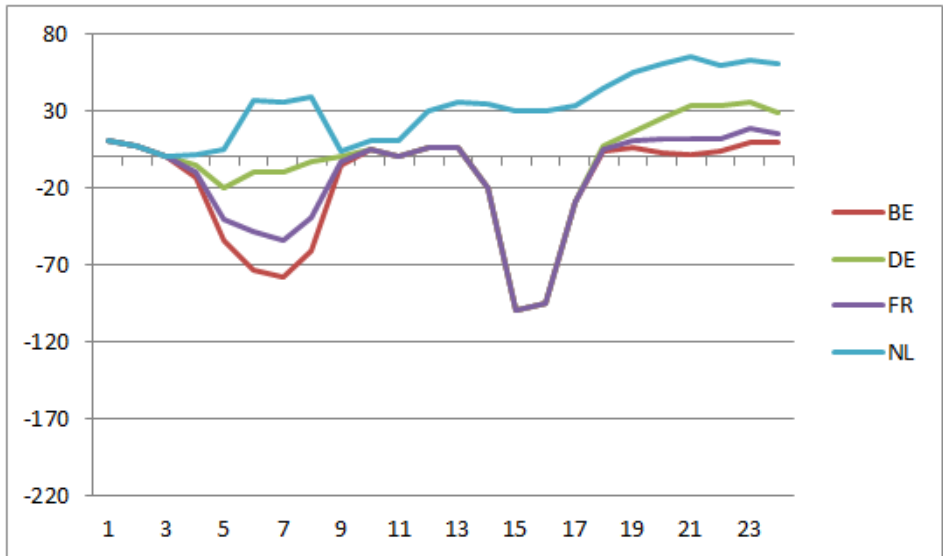

<http://www.casc.eu/en/Resource-center/CWE-Flow-Based-MC/General-Information>

The market results for June 16th are available and presented on next slides.
