EU HAR Impacts on BRP Contract

1. New concepts – Modification of current concepts
2. Border issue: additional borders
3. Varia
4. Questions
5. Planning of BRP Contract modifications

1. New concepts – Modification of current concepts

EU HAR for explicit long term auctions:

Yearly/Monthly capacity products and allocations: FTP options **OR** LT PTR

- To be implemented for 2016 auctions (Q4 2015)
- No nominations anymore required
- Physical or financial rights ? Still to be confirmed for BE hub

Current situation : PTR with UIOSI + nominations

New concepts:

- **Bidding Zone:** used when international exchange in the BRP contract is seen with a market point of view; definition based on EU concept
- **Scheduling Area:** used when international exchange in the BRP contract is seen with a operational/nomination procedure point of view ; definition based on current definition in GL OPS (but onder review)
- **Droit de Transport Long Terme:** term used in Annex 1; complex definition reflecting choice between 2 types of capacity products
- **Shadow Allocation Rules:** term used in Annex 1; definition based on EU concept

Impacts: Articles 1 “Definitions”, 12.3 “Nominations DA / ID”, Annexes 1-5

New concepts – Modification of current concepts

Why ?

Current: mix physical transfert, allocations, network and nominations notions

- Clarification
- More accurate <> EU terminology

Modifications of current concepts:

- **Couplage de marché:** simplification of the definition
- **Border :** simplification of the notion; integration of Scheduling Area notion
- **Import/Export, Import et/ou Export Day-ahead, Import et/ou Export Intraday:** impact of new wording border
- **Echange International:** simplification of the notion; integration of Scheduling Area notion
- **Droit Physique de Transport:** clarification of the definition
- **Guichet:** impact of new wording border
- **Règles d'Enchères Harmonisées:** simplification of the definition
- **Réseau de Transport Etranger Connecté:** removed; use of the notion Scheduling Area

2. Border issue

- **Current situation** : Border North and Border South
- **Near future** : additional borders with Luxemburg, UK and Germany
- **Solution** :
 - Use of generic term of “Border”: no need to be specific + future additional borders
 - Notion less used in the ARP contract => replaced by ‘Scheduling Area’
 - See some definitions; Article 11.5; 12.2.2; Annexes 1 & 5
 - Scheduling Area: more accurate notion (see Annex 5: specific situations)
- **Alternative**: What about no more defining the obvious concept of “border” ?
Solution used in the NCs and HAR

3. Varia

- Article 9.3 : communication to auction entities (European or regional) of any suspension or withdrawal of a BRP
 - currently limited to regulatory authorities, access holders, DSOs and CDS operators
- Who is able to nominate at border ?
 - See Annex 5, § 1.1: 2 situations described
- Transition period before new EU HAR
 - BRP Contract is broad enough

4. Question

- What about use of fax ? To keep it in the BRP Contract as a way to contact Elia/to be contacted ?

5. Planning of the modifications of the BRP Contract

- **27/4 – WG EMD** : explanations impacts from EU HAR
- **28/4 : TF Balancing** : explanations modifications needed for SDR (art. 11 - 12)
- **18/5 – 8/6 (TBC)**: Consultation modifications BRP Contract (via web + mailing)
 - **1/6**: WG Belgian Grid meeting (presentation of modifications)
- **18/6 – Users' Group Plenaire** : feedback consultation
- **June –July** : Finalisation of modifications, translation, informal discussion with regulatory authorities
- **August (at last)**: start of formal approval process with 2 regulatory authorities (CREG + VREG)
 - VREG: 2 months for decision
 - CREG 30 days
- **Week 12/10** : official information to BRPs of new version of the Contract (website, mailing)
- **1/11**: Entry into force of new version of the BRP Contract ; Start of the SR 15-16
